

GROWTH MINDSET

THE
LABORATORY
COLLECTIVE

WELLNESS WORKSHOP

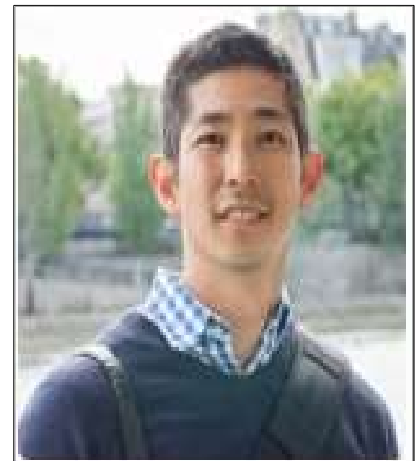

**Wednesday
December 12, 2018
5:15 PM**

Skinner North Auditorium
640 West Scott Street
Chicago, IL 60610

Dr. Ed Kang, co-owner of **the Laboratory**, is coming to teach us strategies to **increase achievement** in math, science, athletics and beyond with ***GROWTH MINDSET***:

- We can **grow** our brains to make more learning connections!
- Why “**smart**” kids lose motivation and underperform in school
- Strategies to help students deal with **challenges**
- Scientific evidence showing intelligence, athleticism, artistic abilities, and temperament are **malleable** and can be improved.

The Laboratory is also partnering with **J@School** and will offer an after school enrichment next session! Please email SkinnerNorthWellness@gmail.com with any questions and/or accommodation assistance requests for our Wellness Workshop!

Dr. Edward Kang, PhD, NBCT, received his doctorate in Neuroscience from Northwestern University and has spent the better part of his career immersed in science teaching and research. Ed spent over a decade teaching in Chicago Public Schools at both an inner-city neighborhood high school and at a highly competitive selective enrollment high school.

All are welcome!
